1 INTRODUCTION

DRC Environmental Pty Ltd (DRC) was commissioned by Intrax to conduct a Preliminary Site Investigation (PSI) for the site located at 99 Bena Road, Korumburra, Victoria (the site). It is understood that the site is currently vacant and is to be redeveloped as a residential subdivision with public open space. The PSI was undertaken in general accordance with DRC's proposal dated 28 April 2022.

The site location is presented in **Figure 1** in the **Figures** section of the report.

1.1 Objectives

The objectives of this PSI are to:

- Complete a preliminary site investigation and environmental contamination assessment to assess the potential risks associated with the proposed development of the site; and
- Make recommendations as to the site's condition and further environmental works that may be deemed necessary for the site based on the findings of this report.

1.2 Scope of Work

The works undertaken at the site to facilitate the completion of the PSI were as follows:

- A review of site details with regards to the site's geographical setting and planning information;
- A desktop assessment of the environmental setting of the site, which includes the geological and hydrogeological profile underlying the site;
- A desktop site history review of selected third party and historic environmental records which may have resulted in soil and/or groundwater contamination at or surrounding the site;
- A site inspection, which forms part of the site history review; and
- Compilation of collected data into a PSI report (this report) with conclusions regarding the suitability of the site for the proposed development and categorisation of the site in accordance with the Department of Environment, Land, Water and Planning (DELWP) *Planning Practice Note 30 - Potentially Contaminated Land* (July 2021).

2 SITE DETAILS

2.1 Site Description

The site is located approximately 122km south-east of Melbourne CBD. For planning information regarding the site, basic and planning property reports were acquired by DRC from the State Government of Victoria. A copy of these reports with other planning information is provided in **Appendix A**. A general summary of the information regarding the site and its surrounding is presented in **Table 2.1** below.

Table 2.1: General Site Information

Site Location	99 Bena Rd, Korumburra VIC (Figure 1)	
Current land use zoning and planning overlays	Zone:	General Residential Zone- Schedule 1 (GRZ1)
	Overlays:	Development Contributions Plan Overlay – Schedule 6 (DPO6)
	Other	Bushfire Prone Area – entire site
Municipality	South Gippsland Council	
Title and plan information	Lot 1 Lot Plan PS321371	
Site Area	Approximately 190712 m ² (19.07 ha)	
Current site use	Vacant	
Surrounding land use	North: General Residential Zone- Schedule 1 (GRZ1) South: General Residential Zone- Schedule 1 (GRZ1) East: General Residential Zone- Schedule 1 (GRZ1) West: Farming (FZ)	
Proposed future use	Residential lot subdivision with open space and associated roadways	

3 ENVIRONMENTAL SETTING

3.1 Topography

The site is hilly and uneven and the elevation is approximately 169 to 204m Australian height datum (m AHD). The highest elevation is at the northeast area and lowest elevation is present towards the western boundary. Information regarding the topography at the site is provided by Brosnan Engineering Solutions, which is provided in **Appendix B**.

3.2 Geology

A review of the 1:250,000 Geological Units indicates that the site is underlain by Wonthaggi Formation consisting of Early Cretaceous-aged lithic volcanoclastic sandstone, arkose, siltstone, minor conglomerate and coal. Natural soil conditions identified during the intrusive soil works (see Section 7.5.1 below) were generally consistent with this description.

Information regarding the geology underlying the site, including a figure of the geological conditions, is provided in **Appendix B**.

3.3 Surface Water

A creek is present in the southwest corner of the site, running northwest to southeast.

3.4 Hydrogeology

3.4.1 Environmental Values of Groundwater

A search of groundwater conditions at the site from the DELWP groundwater resource map (www.water.vic.gov.au) identified that the site is underlain by the Mesozoic and Palaeozoic Bedrock Sedimentary Aquifer which consists of sandstone, siltstone, mudstone, shale.

The anticipated groundwater depth was reported to be 10-20 metres below ground level (mbgl) (44% of the site), 20-50 mbgl (41% of the site), 5-10 mbgl (9% of the site) and less than 5 mbgl (6% of the site). Total Dissolved Solids (TDS) concentrations ranging between 1000 mg/L and 3500 mg/L were anticipated in groundwater underlying the site.

The TDS range places the site within Segments A2, B or C of the groundwater segments outlined in the Victoria Government Environment Reference Standard (ERS) 2021. Based on this classification, the following environmental values to be protected are:

- Water dependent ecosystems and species
- Potable water supply - acceptable - A2 only
- Potable mineral water supply
- Agriculture and irrigation - irrigation – A2 and B only
- Agriculture and irrigation - stock watering
- Industrial and commercial use
- Water-based recreation (primary contact recreation)
- Traditional Owner cultural values

- Buildings and structures
- Geothermal properties

Information relevant to the hydrogeology underlying the site is presented in **Appendix B**.

3.4.2 Groundwater Database Search

An unregistered groundwater bore is present on the western boundary of the site. Its use is unknown.

A groundwater database search identified a total of 117 registered groundwater bores within an approximate 2 km radius of the site. Of the 117 groundwater bores, only one groundwater bore was listed as being used for an extractive purpose (domestic and stock) and was located 1190 m east of the site. Other information regarding the domestic and stock bore was not available.

The remaining non-extractive groundwater bores were listed as being used for non-groundwater purposes, or groundwater investigation.

The closest groundwater bore (311365) is a bore listed for non-groundwater purposes and is located 870 m southeast of the property. Other information regarding the bore was not available.

Information regarding groundwater bores within a 2 km radius of the site is presented in **Appendix B**.

4 SITE INSPECTION

A site inspection was undertaken by DRC on 27 September 2022, which comprised a visual inspection of the site. Key features observed during the site inspection comprised the following:

- Access to the site is from Bena Road;
- The site is significantly uneven and is vacant with fencing surrounding the land;
- The site has long grass with tree cover towards the southwest boundary near the creek;
- A water tank is present in the northern portion of the site, sealed off with concrete on top with a pipe connected to the water tank that runs into the ground;
- A groundwater monument was identified on site at the western boundary of the site;
- A creek is present running southwest in the southern portion of the site. The creek's flow was blocked off by sediment which is used as a crossing path at two sections along the creek;
- No stockpiles, odorous/stained soils or asbestos-containing materials (ACM) were identified at the site during the site inspection; and
- Surrounding uses include livestock grazing on the south and west side. Low-density residential dwellings are present towards the north and east side with housing construction towards the north.

The **Plates** section of the report details site photographs taken at the time of the site inspection and **Figure 2** in the **Figures** section of the report shows the features present on site.

5 SITE HISTORY REVIEW

To identify activities that have the potential to cause contamination that may have been undertaken at the site, a review of a range of media likely to provide insight into the history of the site was undertaken.

5.1 Previous Environmental Site Assessment

DRC has not been made aware of any previous environmental site assessments (ESAs) undertaken at the site.

5.2 Historical Aerial Photographs

A search of aerial imagery from DELWP (Vicmap Topographic Mapping Program), Google Inc and Aerometrex was undertaken and 8 aerial photographs from between 1947 and 2021 were reviewed. DRC's findings of the review are summarised below in **Table 5.1** and copies of the aerial photographs are presented in **Appendix C**.

Table 5.1: Historical Aerial Photographs Review

Date	Site Description	Surrounding Land Use	Reference
1947	Site appears to be part of a large open grazing property, with a creek and cluster of trees in the southwest corner. Site appears to have multiple dirt roads.	North: An unsealed road is present towards the north which is Bena Road. Low density residential land is present towards the north east. Majority of the area appears to be used for grazing. South: Korumburra-Wonthaggi Road is present towards the southeast. Single dwelling is present. East/West: Grazing	DELWP
1972	One shed is present on the northwest boundary. Tree line is present in the northern portion of the site, forming a L shape.	Increase in residential dwellings towards the north, east and south.	DELWP
1979	Conditions remain generally the same from 1972 aerial photograph.	Two farm dams are present in the south. The eastern area has additional residential dwellings.	DELWP
1985	Conditions remain generally the same from 1979 aerial photograph.	Conditions remain generally the same from 1979 aerial photograph, with a further increase in residential dwellings in the east.	DELWP
1990	Conditions remain generally unchanged from 1985 photograph.	Conditions remain generally the same from 1985 aerial photograph.	DELWP
2010	The shed is no longer is present.	Conditions remain generally the same from 1990 aerial photograph, with more trees present in the northeast.	Google Inc

Date	Site Description	Surrounding Land Use	Reference
2015	The site has been mowed.	Increase in roads and residential dwellings in the east. Sections in the north have been mowed.	Google Inc
2021	Grass has regrown on the site.	Two additional dwellings are present in the north and land has been cleared for further housing developments	Aerometrex

The aerial photograph review indicates the following with regards to the site and surrounding area:

- From at least 1947 to 1972 the site was either vacant or used as livestock grazing;
- From at least 1972 a shed was present on site and was removed somewhere around 1990 to 2010;
- The surrounding area primarily consisted of agricultural/grazing paddocks from at least 1947 with a couple of residential properties and associated sheds. Between 1972 and 2021 low density residential development started occurring, primarily to the east of the site.

5.3 Historical Certificates of Title

Copies of the current registered certificate of title were obtained by DRC. A summary of the certificates of title is provided in **Table 5.1** below.

Table 5.1: Certificates of Title

Volume/Folio Reference	Land Description/Activity	Period of Ownership	Proprietor
10125/714 Parent title: 03138/541	Lot 1 on Plan of Subdivision 321371X	26 June 2000 - 25 May 2003	Francis John Farrell
		25 May 2003 – 24 September 2003	Mervyn Charles Prosser Kathleen Mary Prosser
		24 September 2003 – 12 September 2007	Mervyn Charles Prosser Lois May Tonkin Steven John Tonkin Helena Tonkin Frances Tonkin Evan Charles Tonkin
		12 September 2007 – 14 January 2019	Rossi Group Pty Ltd
		14 January 2019 - Current	Hillview Rise Pty Ltd

The certificate of title indicated the following:

- The site has been owned by individuals from at least 2000 to 2007; and
- Development companies have owned the site since 2007.

A copy of the certificates of title are provided in **Appendix C**.

5.4 Historical Maps

A search of Historical Maps found two maps of the site and surrounding area from 1931 and 1972. DRC's findings of the review are summarised below in **Table 5.2** and copies of the maps are presented in **Appendix C**.

Table 5.2: Historical Maps

Date	Site Description	Surrounding Land Use	Reference
1931	Two contour lines are running through the site with trees on the site	<ul style="list-style-type: none"> Bena Road is depicted north of the property Several creek lines and water bodies are depicted The suburbs Whitelaw and Holmes Hill are present Major roadways are highlighted with some minor roads shown in the east Dwellings are depicted north, east and south of the site 	Commonwealth map
1972	One contour line is running through the site. Creek line is present in the southwest corner	<ul style="list-style-type: none"> TV Tower and Golf course are marked on the map to the north of the site The suburbs Korumburra and Holmes Hill are marked Dwellings are marked to the north and south 	NATMAP

DRC also reviewed nearby features. The search did not identify properties that are likely to cause contamination risk to the site.

5.5 Historical Business Directories Review

A review of historical businesses within a 150 m radius of the site and historical dry cleaners, motor garages and service stations within a 500 m radius of the site was undertaken using Sands & McDougall directories and Universal Business Directories from 1905 to 1991 (last Sands & McDougall directory produced in 1974).

Nine businesses were identified within a 150m radius of the site. This included Truck and Bus hire, veterinary surgeons, hostels and earth moving contractors. However, no businesses with activities that have the potential to cause contamination were identified at or in the vicinity of the site.

In 1980 a motor garage or service station was in operation along Jumbunna Road, which is located 276m east of the site. It is uncertain where this business was along Jumbunna Road, however it was considered likely to be sufficiently far away to be unlikely to impact the site.

Details regarding the historical business directories search are provided in **Appendix D**.

5.6 Environment Protection Authority

5.6.1 EPA Priority Sites Register, Former EPA Priority Sites & EPA Pollution Notices

A search of the EPA Victoria Priority Sites Register (PSR), former EPA priority sites and EPA pollution notices was undertaken to identify whether the site or any surrounding properties within a 1 km radius of the site were listed as priority sites, former priority sites or have been issued with a pollution notice by the EPA Victoria.

The search identified the following former EPA priority sites and other pollution notices:

- Previous Pollution Abatement Notice 90010444 on Bena Road, Korumburra (953m West of the site);
- Previous Pollution Abatement Notice 90010524 on Bena Road, Korumburra (953m West of the site);
- Previous Pollution Abatement Notice 90012180 on Bena Road, Korumburra (953m West of the site);
- Current Pollution Abatement Notice 90011031 on Bena Road, Korumburra (953m West of the site); and
- Clean Up Notice 90012143 on Bena Road, Korumburra 953m West of the site.

DRC notes that due to the distance from the site, the property does not pose a contamination risk to the site.

Information regarding EPA priority sites and pollution notices is provided in **Appendix E**.

5.6.2 EPA Audit Reports

A search of the EPA Victoria list of Certificates and Statements of Environmental Audit and 53V Audit Reports was undertaken to identify whether the site or any surrounding properties within a 1 km radius of the site were listed as environmental audit sites.

The search did not identify any EPA Audit sites within a 1 km radius of the site.

Information regarding the environmental audit report search is provided in **Appendix E**.

5.6.3 EPA Victoria Licensed Premises

EPA licenses are required for premises owned by a person, company, statutory corporation or municipal council whose operations may adversely affect the environment (including waste acceptance and treatment, air and water discharges and noise and odour).

A search of the EPA Victoria list of licensed premises and former licensed premises identified one Amalgamated license (74240) conducting sewage treatment in Bena Road, 954m West of the site for South Gippsland region water corporation. This was not considered likely to impact the site due to distance.

Information regarding the EPA Victoria Licensed Premises search is provided in **Appendix E**.

5.6.4 EPA Groundwater Quality Restricted Use Zones

A search of EPA Victoria GQRUZs was undertaken to identify historic groundwater pollution as a result of previous industrial activity.

The search did not identify any site within a 1 km radius of the site as having a GQRUZ. GQRUZs are therefore not considered to pose a potential contamination risk to the site.

Information regarding the GQRUZ search is provided in **Appendix E**.

5.7 Waste Management Facilities and Landfills

Searches of the following databases were undertaken to identify whether any waste management facilities and/or landfills are located at the site or within a 1 km radius of the site:

- National Waste Management Site Database (National Waste Database);
- Statewide Waste and Resource Recovery Infrastructure Plan Facilities Database (Statewide Waste Database);
- EPA Prescribed Industrial Waste treaters, disposers and permitted transporters (EPA PIW Database);

- EPA Victorian Landfill Register sites (EPA Landfill Register);
- Former waste disposal sites (search from various historical sources); and
- Historical Mining.

The search identified two EPA Prescribed Industrial Waste facilities:

- Current EPA Prescribed Industrial Waste
Combined Roofing Services Pty Ltd (293 Whitelaw Rd, Korumburra), 325m Southwest
- Previous EPA Prescribed Industrial Waste
P Taylor Automotive Repairs Pty Ltd (31 Sanders Steet, Korumburra), 823m North

DRC do not consider these properties to pose a contamination risk to the site since both sites are only transport and not treatment or disposal. They are also over 300m in distance from the site.

Information regarding waste management facilities and database searches is provided in **Appendix E**.

5.8 Other Government Record Review

Searches of other relevant government records/databases were also undertaken to assess for potential contamination at or surrounding the site as follows:

- EPA Victoria – Works Approvals;
- EPA Victoria – PFAS Site Investigations;
- Department of Defence, Australian Government – Defence PFAS Investigation & Management Program (Investigation Sites and Management Sites);
- Airservices Australia – National PFAS Management Program;
- Department of Defence, Australian Government – Defence 3 Year Regional Contamination Investigation Program;
- Various historical sources – Former Gasworks; and
- State Government Victoria, Department of Economic Development, Jobs, Transport & Resources – Historical Mining Activity, Shafts.
- Groundwater Dependent Ecosystems Atlas
- Cultural Heritage Sensitivity

The findings of the above searches did not identify any potential contamination risks at or surrounding the site.

Further details regarding the above searches are provided in **Appendix E**.

5.9 Summary of Site History Review

The site history review identified the following with regards to the site:

- From at least 1947 to 1990 the site was potentially used for livestock grazing with a small shed being present on site from 1972 till it was removed between 1990 to 2010.
- The surrounding area primarily consisted of agricultural/grazing paddocks from at least 1947 with a couple of residential properties and associated sheds. Between 1972 and 2021 low density residential

development started occurring.

- There is no evidence of extensive industry or farming practices (including poultry farms) having occurred at the site.
- No current or historical features/businesses identified in the area surrounding the site are considered to pose a potential contamination risk to the site.
- No previous ESAs with regards to contamination were identified to have been undertaken at the site.
- A search of the EPA's current and former priority sites and pollution notices identified five pollution notices for a site 953m west, however due to the distance it is not considered to pose a contamination risk.
- A search of current and former waste management facilities and landfills identified two EPA Prescribed Industrial Waste facilities; however, DRC do not consider these sites contamination risks since both sites are only transport and not treatment or disposal.
- A search of EPA licensed sites, Certificates and Statements of Environmental Audit and 53V Audit Reports and EPA GQRUZ identified one license site 954m west of the property. Due to its distance DRC do not consider it to have a potential to cause contamination to the site.
- A search of other government records/databases did not identify any properties within a 1 km radius that would pose a contamination risk to the site.

6 CONTAMINANTS OF POTENTIAL CONCERN (COPCS)

Based on the findings of the site inspection and site history review, COPCs identified for the site are presented in **Table 6.1** below. It should be noted that the identified COPCs presented below are based on DRC's previous experience with similar properties and may not be applicable to the site.

Table 6.1: Contaminants of Potential Concern Applicable to this Site

Site Use	Contaminants of Potential Concern	Likely media in which COPCs may be identified at the subject site
Grazing	Pesticides (organochlorine pesticides) and metals	Shallow soils

Based on the findings of the site history review, it is considered unlikely that past on- and off-site activities would have impacted groundwater or be drivers for groundwater/soil vapour issues.

7 CONCLUSIONS AND RECOMMENDATIONS

The site identified as 99 Bena Road, Korumburra has been subject to a preliminary site investigation (PSI), which included a desktop review of site planning information, environmental setting of the site and the site's history.

With regards to the findings of the PSI, the following conclusions have been made:

- The site history review identified a low potential for contamination based on the site's past use for grazing, agriculture, and open paddocks.
- A review of historical maps, directories and EPA databases did not identify any properties with the potential to pose a contamination risk to the site.

In accordance with the DELWP *Planning Practice Note 30 - Potentially Contaminated Land (PPN30)*, the site does not meet the definition of 'potentially contaminated land' as no land uses listed in Table 2 of PPN30 as having a high or medium potential for contamination have been found to have occurred at the site and the potential for contamination was therefore considered low.

Considering the absence of any significant contaminating land uses at the site, as determined by the compiled site history evaluation, the site inspection and the absence of any observed potentially contaminating infrastructure, DRC considers the site can be considered **not potentially contaminated land** noting the site has not demonstrated any use for industrial or mining purposes, has not been used for chemical, fuel or waste storage and has not been used for any known past or present activity that may be cause for contamination to the land. On this basis, in the opinion of DRC, the site is not subject to provisions made by Ministerial Direction No.1 under Section 12(1A) of the *Planning and Environment Act 1987*.

DRC makes the below recommendations:

- Based on the site history review, it is recommended that some soil sampling should be undertaken to verify the soil condition at the site and to screen for potential presence of Contaminants of Potential Concerns (COPC) in the soil. In addition, soil sampling for the purpose of off-site disposal of materials likely to be resulted from future civil work should be undertaken as a requirement from EPA publication 1828.2 *waste disposal categories – characteristics and thresholds*.
- Any soils that are to be brought onto the site should be tested to assess potential for contamination prior to placement; and
- Based on the findings of this assessment report, a PRSA and/or environmental audit is not required for this site for its intended future residential use.

8 STATEMENT OF LIMITATIONS

This document has been prepared based on a specific brief provided to DRC Environmental by Intrax. This document has been prepared with care and consideration to acceptable standards and current industry practice. This document is based on sub-surface conditions that may be variable which may result in changes to procedures, advice, recommendations, or professional conclusions established by this document. DRC Environmental therefore reserve the right to change or withdraw this report.

DRC Environmental recommends only suitably qualified and experienced contractors and consultants should undertake technical assessment of this document and attempt contaminated land remediation projects.

PROPERTY REPORT

Planning scheme data last updated on 20 September 2022.

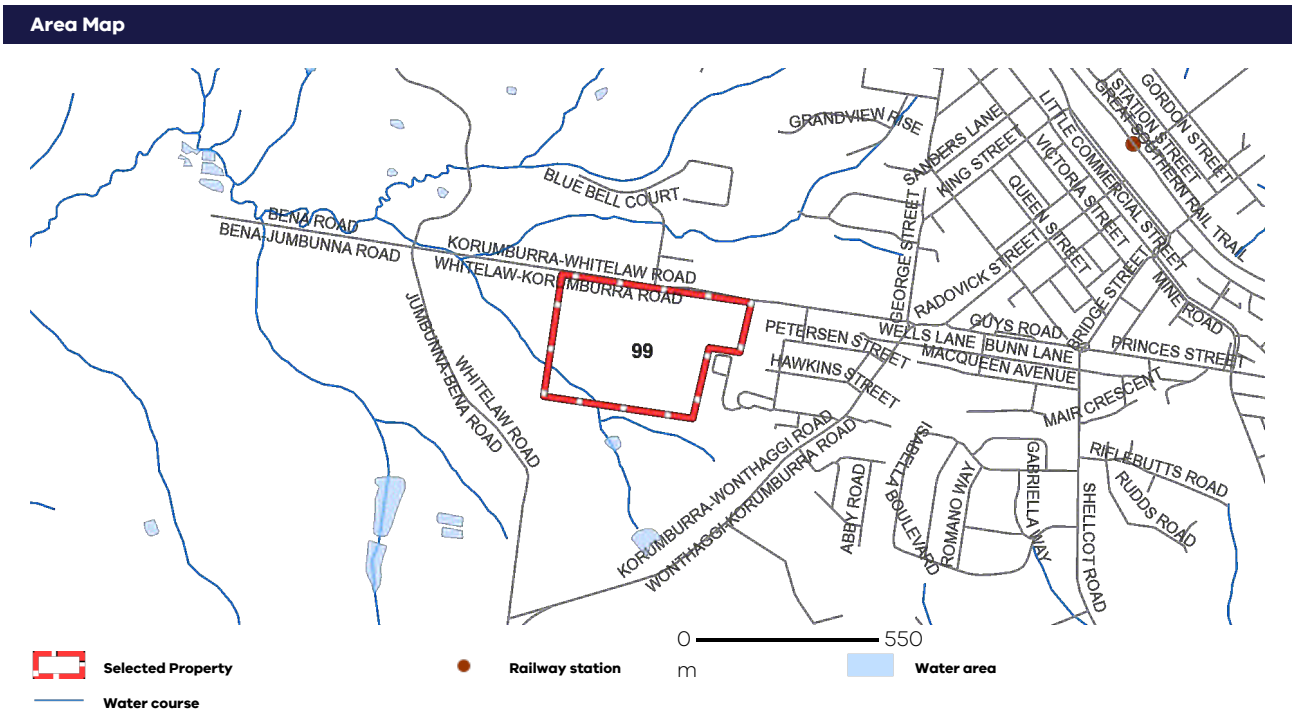

A **planning scheme** sets out policies and requirements for the use, development and protection of land. This report provides information about the zone and overlay provisions that apply to the selected land. Information about the State and local policy, particular, general and operational provisions of the local planning scheme that may affect the use of this land can be obtained by contacting the local council or by visiting <https://www.planning.vic.gov.au>

This report is NOT a **Planning Certificate** issued pursuant to Section 199 of the **Planning and Environment Act 1987**. It does not include information about exhibited planning scheme amendments, or zonings that may apply to the land. To obtain a Planning Certificate go to Titles and Property Certificates at Landata - <https://www.landata.vic.gov.au>

For details of surrounding properties, use this service to get the Reports for properties of interest.

To view planning zones, overlay and heritage information in an interactive format visit <https://mapshare.vic.gov.au/vicplan>

Further Planning Information

Planning scheme data last updated on 20 September 2022.

A **planning scheme** sets out policies and requirements for the use, development and protection of land. This report provides information about the zone and overlay provisions that apply to the selected land. Information about the State and local policy, particular, general and operational provisions of the local planning scheme that may affect the use of this land can be obtained by contacting the local council or by visiting <https://www.planning.vic.gov.au>

This report is NOT a **Planning Certificate** issued pursuant to Section 199 of the **Planning and Environment Act 1987**. It does not include information about exhibited planning scheme amendments, or zonings that may affect the land. To obtain a Planning Certificate go to Titles and Property Certificates at Landata - <https://www.landata.vic.gov.au>

For details of surrounding properties, use this service to get the Reports for properties of interest.

To view planning zones, overlay and heritage information in an interactive format visit <https://mapshare.maps.vic.gov.au/vicplan>

For other information about planning in Victoria visit <https://www.planning.vic.gov.au>

PLANNING PROPERTY REPORT

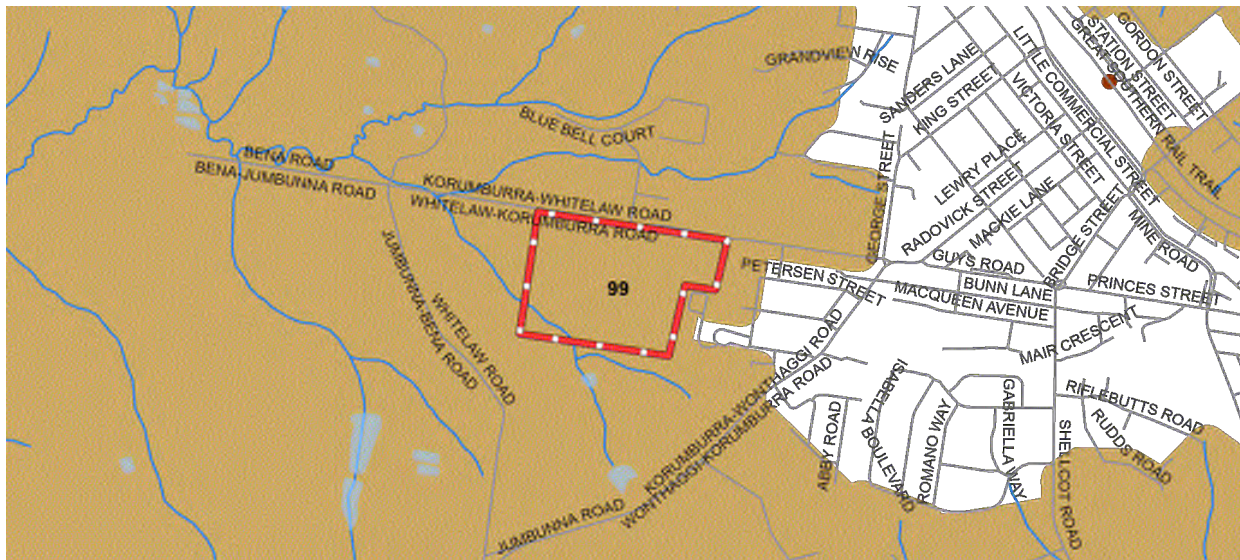

Designated Bushfire Prone Areas

This property is in a designated bushfire prone area. Special bushfire construction requirements apply to the part of the property mapped as a designated bushfire prone area (BPA). Planning provisions may apply.

Where part of the property is mapped as BPA, if no part of the building envelope or footprint falls within the BPA area, the BPA construction requirements do not apply.

Note: the relevant building surveyor determines the need for compliance with the bushfire construction requirements.

Designated BPA are determined by the Minister for Planning following a detailed review process. The Building Regulations 2018, through adoption of the Building Code of Australia, apply bushfire protection standards for building works in designated BPA.

Designated BPA maps can be viewed on VicPlan at <https://mapshare.vic.gov.au/vicplan/> or at the relevant local council.

Create a BPA definition plan in [VicPlan](#) to measure the BPA.

Information for lot owners building in the BPA is available at <https://www.planning.vic.gov.au>.

Further information about the building control system and building in bushfire prone areas can be found on the Victorian Building Authority website <https://www.vba.vic.gov.au>. Copies of the Building Act and Building Regulations are available from <http://www.legislation.vic.gov.au>. For Planning Scheme Provisions in bushfire areas visit <https://www.planning.vic.gov.au>.

Native Vegetation

Native plants that are indigenous to the region and important for biodiversity might be present on this property. This could include trees, shrubs, herbs, grasses or aquatic plants. There are a range of regulations that may apply including need to obtain a planning permit under Clause 52.17 of the local planning scheme. For more information see [Native Vegetation \(Clause 52.17\)](#) with local variations in [Native Vegetation \(Clause 52.17\) Schedule](#).

To help identify native vegetation on this property and the application of Clause 52.17 please visit the Native Vegetation Information Management system <https://nvim.delwp.vic.gov.au/> and [Native vegetation \(environment.vic.gov.au\)](#) or please contact your relevant council.

You can find out more about the natural values on your property through NatureKit [NatureKit \(environment.vic.gov.au\)](#)

APPENDIX B – ENVIRONMENTAL BACKGROUND

Depth to Watertable

99 Bena Road, Korumburra, VIC 3950

Hydrogeology & Groundwater

99 Bena Road, Korumburra, VIC 3950

Hydrogeology

Description of aquifers within the dataset buffer:

Description	Distance	Direction
Fractured or fissured, extensive aquifers of low to moderate productivity	0m	On-site

Hydrogeology Map of Australia: Commonwealth of Australia (Geoscience Australia)
Creative Commons 3.0 © Commonwealth of Australia <http://creativecommons.org/licenses/by/3.0/au/deed.en>

Groundwater Salinity

On-site Groundwater Salinity:

Groundwater Salinity	Percent Of Site Area
1,000 - 3,500 mg/l	100

Depth to Watertable

On-site Depth to Watertable:

Depth to Watertable	Percent Of Site Area
10 to 20 metres	44
20 to 50 metres	41
5 to 10 metres	9
Less than 5 metres	6

Surface Elevation

Approximate on-site Surface Elevation:

Surface Elevation
165 AHDm to 201 AHDm

Basement Elevation

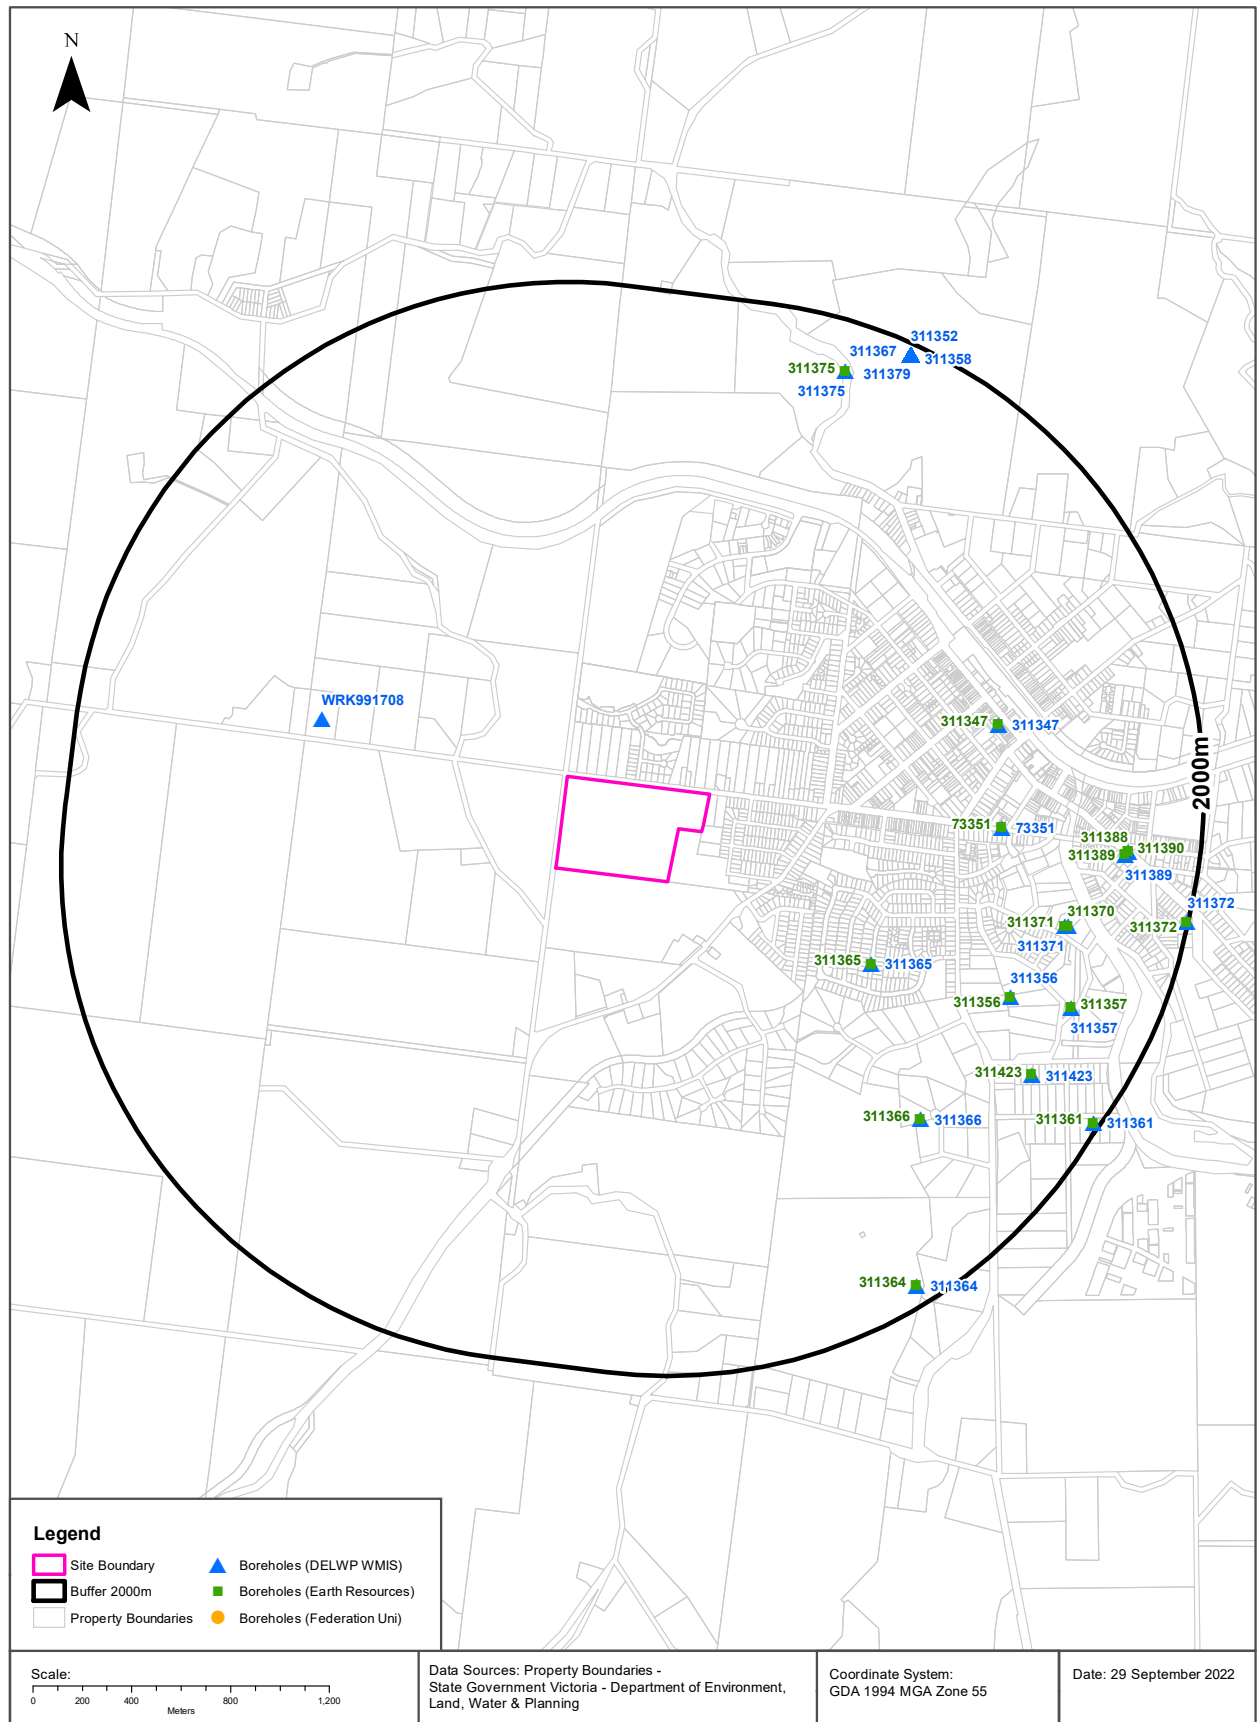

Approximate on-site Basement Elevation:

Basement Elevation - Basement Rocks comprise Lower Palaeozoic basement rocks that form the highlands and the crystalline basement; and Mesozoic rocks of the Otway and Gippsland basins both outcropping and subsurface
165 AHDm to 201 AHDm

Historical Mining Activity - Shafts

99 Bena Road, Korumburra, VIC 3950

Historical Mining Activity - Shafts

Mine Shaft Locations were collected by a variety of methods from 1869 in some areas of the state, mainly concentrating in Ballarat and Bendigo. In places a shaft may be recorded multiple times with a different source. In cases where several shaft locations are shown close together (generally with separations less than stated position errors) and they have different sources, it is possible that one shaft has been mapped several times. In cases where several shaft locations are shown close together but they have the same information source, it is possible that each shaft location represents a different shaft on the ground.

Historical Mine Shafts within the dataset buffer:

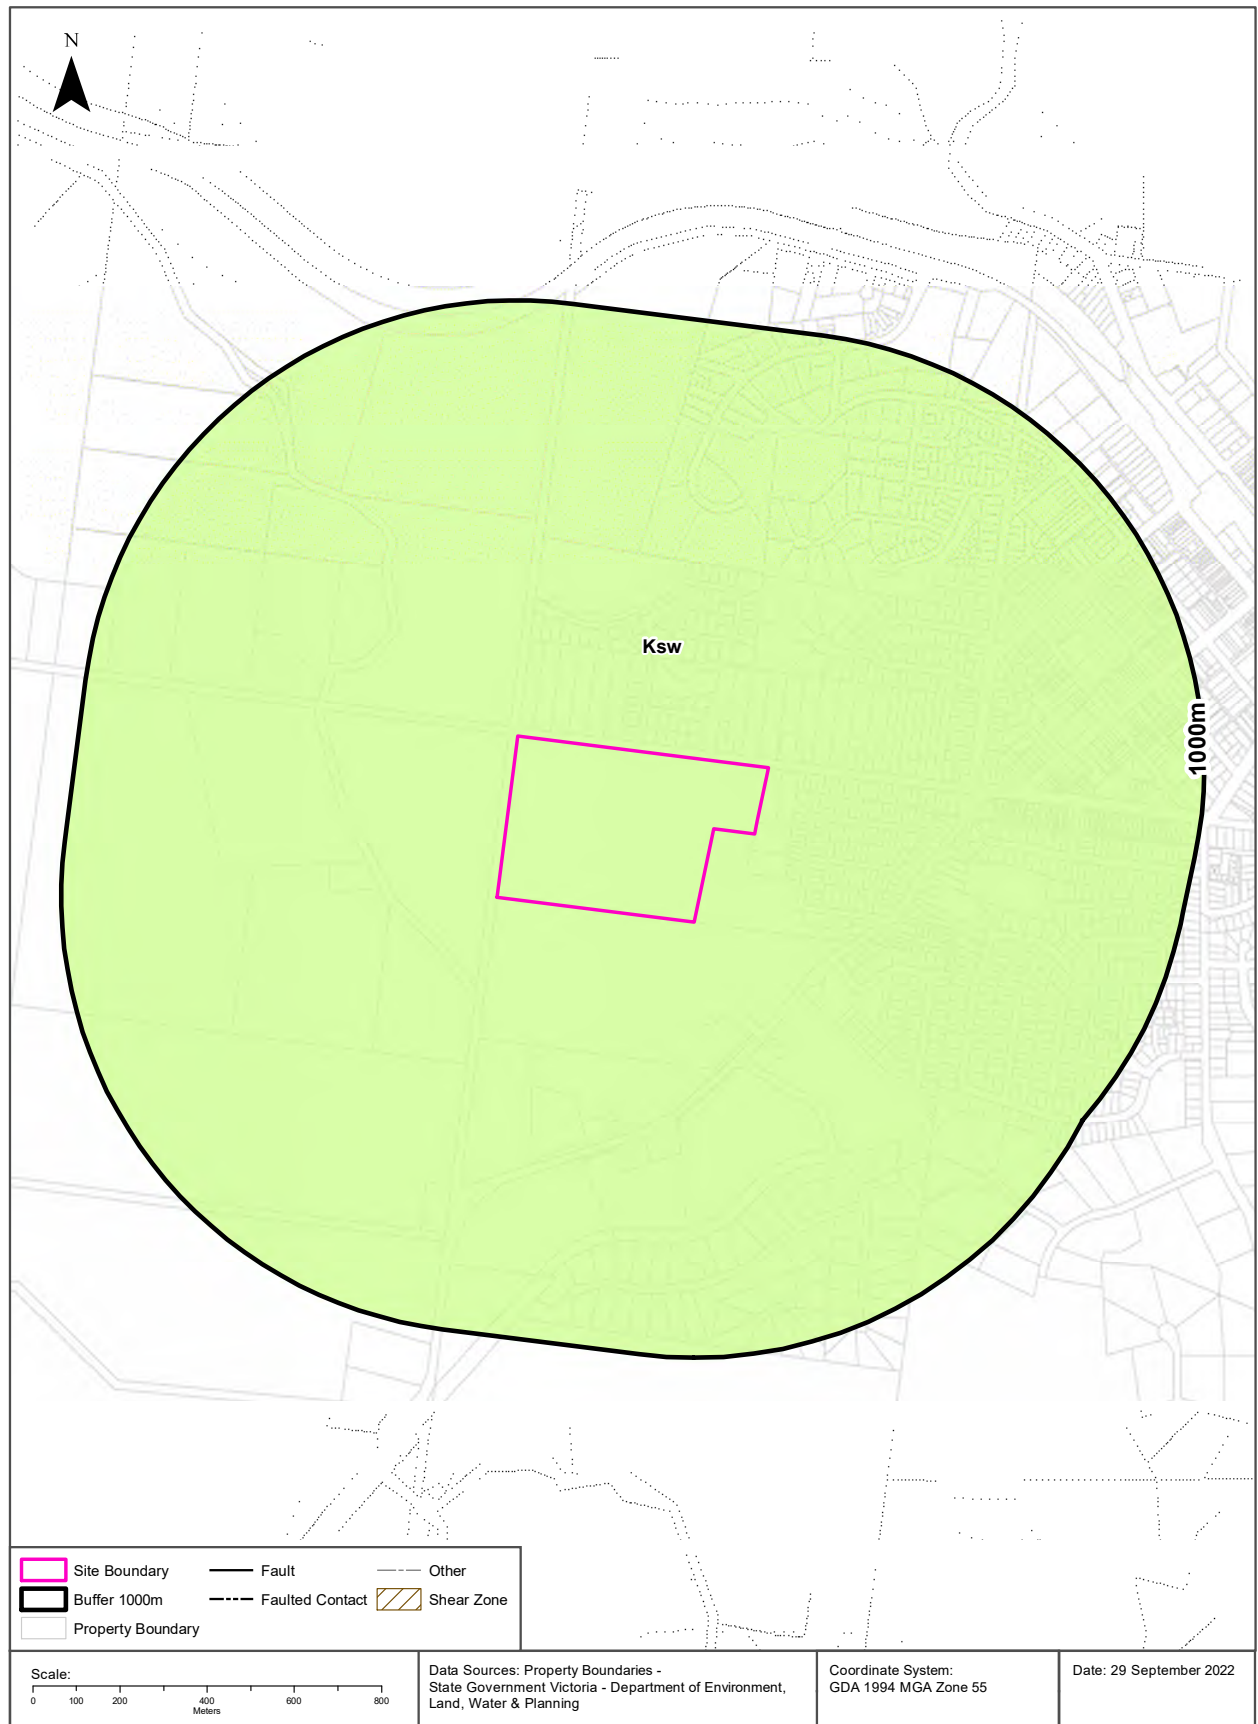

Map Id	Name	Source	Depth (m)	Collar (ft)	Fill/Cap Method	Location Desc	Location Accuracy	Distance	Direction
